

Project +Resilient supports
social innovation and social
entrepreneurship development
in the Mediterranean area.

Public authorities, civil society, private and educational sector
from 7 MED countries work together forming
a 4-helix partnership.

Our local stakeholders join in Clusters
with high social vocation and
responsiveness (SVRC).

We have tested innovative tools, methods and
strategies to reinforce SVRC at local level...

...and created policy recommendations
for social innovation and social
entrepreneurship development...

...because we believe that social
innovation has a strategic dimension
in the upcoming Just transition
transformation in Europe.
